Work Experience

Software Engineer

2025 - Present

Data Crunch Limited, Gulshan 1, Dhaka

I am currently working as a Frontend Software Engineer at Data Crunch Limited, where I focus on building dynamic and user-friendly web applications using **React** and **Next.js**. My role involves translating Figma designs into clean, reusable, and efficient components while ensuring responsiveness and performance across all devices. I collaborate closely with designers and backend developers to create seamless user experiences and maintain a consistent UI across projects.

Frontend Software Engineer

2024 - 2025

Dream Diver, Bijoy Sharani, Dhaka.

I worked at DreamDiver as a Frontend Software Engineer, where I was responsible for developing and maintaining responsive, user-focused web applications. My tech stack included React, Next.js, Tailwind CSS, shadcn/ui, Material UI (MUI), and DaisyUI. I collaborated closely with the design and backend teams to implement pixel-perfect UIs and perform API integrations for dynamic data handling.

Jr. Software Engineer

2021 - 2023

Ultra -X Asia Pacific, Baridhara J Block, Dhaka

Ultra -X Asia Pacific is a Japan based software firm which has a branch at Baridhara J Block, Dhaka, Bangladesh. I worked there as a Junior Software Engineer and worked on Angular, React and also in UI/UX designing.

Education

B.Sc. in CSE

2014 - 2019

East West University

I have completed my Bachelor's degree in Computer Science and Engineering (CSE) from East West University. During my time there, I developed a strong foundation in programming, algorithms, data structures, and software development principles.

Skills

HTML

CSS

Tailwind.css

JavaScript

TypeScript

React

Next.js

shadcn/ui

Recent Live Projects

Software Development (Sept-2021 – Present)

Some of my projects are showed here Live.

[Foody Moody](#)

(Restaurant)

Dream Diver Client project.

Foody Moody is a Netherlands restaurant project which I had developed for our Dream Diver client. I did the entire frontend of this project. The frontend is developed using React, Tailwind.css and its a re-usable component based frontend.

[Credit-Hero](#)

(Landing Page)

Data Crunch Client Project

This project is a landing page for a client of Data Crunch. I have converted from Figma to Typescript and Next.js. Later company has plan to implement Backend to it.

[Misi Nuro Hospital](#)

(Hospital Project)

Dream Diver Client Project

MiSi Neuropsychology is characterized by the immediate delivery of high-quality care. I did the frontend of this hospital using TypeScript and Next.js.

[Dream Diver Website](#)

(Company Website)

Dream Diver Official Website

After my joining to Dream Diver, I was given the responsibility to update their website. It was developed in PHP. I have updated the existing website with attractive design and helped the development team to develop it.

[Smart Office](#)

(Employee Management)

Ultra -X Client Project for managing employees

In software firms, employee management is a vital issue. From on-boarding to task completion, lots of issues are required to be solved. Our Smart Office project is developed to address these issues. Angular, Typescript, Node.js, MongoDB were the stacks used to develop. I did the Frontend part of this project.
